3 HANDS, DATE AND POWER RESERVE CALIBRE P-1020

Perrelet watches for women are state of the art timepieces, nothing less than sublime accessories, both useful and functional.

Your new timepiece is fitted with the exclusively designed rotor, the signature of Perrelet's high-quality, precision movements, glass-covered to display the workmanship of the movement and the beauty of the Perrelet decoration. This decorative concept for the oscillating weight was developed by Perrelet's own watchmakers and designers to pay tribute to the fabulous invention of Abraham-Louis Perrelet, the automatic movement (around 1770). This system allows the watch to wind up by simply using the energy produced by the wearer's own movements.

Your new watch, with the Perrelet calibre P-1020, was created to provide you with the clearest possible readability. The simple display (central hour, minute and second hands, power reserve and date) are characteristic of the quality and individuality of the Perrelet collection. Each detail of this piece has been carefully designed to satisfy the most demanding owner. Your new timepiece subtly blends technique and softness to give you unsurpassed comfort in wear.

With a combination of the finest leather or steel bracelet, with unmatched softness, the dials themselves are perfectly clear to read, using to full advantage the natural reflections inherent in fine mother of pearl.

TECHNICAL DATA ON THE MOVEMENT

- Thickness of the basic movement, oscillating weight included: 5.65 mm
- Fitting diameter: 25.60 mm
- Total diameter of the movement: 26.20 mm
- Vibrations/hour: 28,800 (4Hz)
- Jewelling: 24 rubies
- Autonomy of the movement, fully wound: more than 42 hours
- Automatic winding mechanism with oscillating weight fitted on ball bearing
- "Incabloc" shock-resistance system for the balance wheel
- Accurate time setting system

DESCRIPTION OF THE WATCH

Information provided by the watch

- hours
- minutes
- seconds
- power reserve at 6 o'clock
- date at 3 o'clock

Information shown on diagram

- 1 Hour hand
- 2 Minute hand
- 3 Second hand
- 4 power reserve
- 5 Date window

Your watch has a 3-position crown:

- A Crown in the movement's manual winding position
- B Crown in the quick correction of the date position
- C Crown in the position for setting the time

BASIC FUNCTIONS

Setting the time on the watch

Pull crown to the C position. The time can then be set without a risk turning the crown forward or back.

Quick correction of date

Pull crown to the B position. The date can then be corrected by turning the crown back.

Winding the watch

If the watch stops, a few turns of the crown (in position A) will start it again. It will be wound up further by the movements of the wearer's wrist.
